DETAILED ACTION

Election/Restrictions

Applicant's election of species A in the reply filed on 9/30/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wilke et al.

Wilke et al teaches an interface assembly having a payload attach fitting, a shock and vibration isolation assembly having a spring plate 10, stop assembly (bolt that goes through hole 15), and damping device 12. The spring plate has internal opening (see figures).

Please note that it would have been obvious to one skilled in the art to have made the spring plate out of any material/metal so that spring plate can be strong and lightweight. Also note that it would have been obvious to one skilled in the art to have made the stop assembly to limit the compression and tension of the spring plate to 0.01 inch so that the vibration would not damage the spacecraft system. Furthermore, it would have been obvious to one skilled in the art to have made the spring plate natural oscillation frequency be 40 Hz and the damping constant be approximately 20% to prevent vibration damage to the spacecraft system.

Allowable Subject Matter

Claims 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sciulli et al, Starkovich et al, Sutcliffe et al, Dykema, Hamontre, and Andry disclose damping means.
